

DATASHEET - AI AGENTS (VOICE)

# Enhance Your Member Experience

**AI Voice Agents** is the industry's first generative AI-driven solution designed specifically for community financial institutions to elevate member experience and digital engagement. Equipped with advanced Safe AI technology, AI Voice Agents provide robust self-service capabilities and operational efficiency. Seamlessly integrating into your existing phone system and core banking platforms, it automates transactional workflows with precision and reliability.

Up to

**99%**

accuracy in knowledge responses

Contain up to

**80%**

of voice calls\* reducing operational load

**10x**

faster deployment compared to traditional solutions

**24x7**

availability – ensuring anytime, anywhere support

**Multi-language**

capabilities to reach 30–40% more members

\* Results may vary based on the credit union's knowledge base and training.

**All Impact**

## Innovative Generative AI-Driven Solution

AI Voice Agents is the industry's first generative AI-driven solution that seamlessly integrates with your existing phone system and core banking platforms. This ensures the automation of transactional workflows and enhances communication across various channels, leading to a cohesive experience for your members. The advanced Safe AI technology allows community financial institutions to improve member experience and digital engagement while optimizing operational efficiency.

### Benefits

#### **No Conversation Designing**

Cuts 95% of design time.

#### **No Language Translation Required**

Saves 40% of overall implementation time.

#### **No Escalations Due to Non-Compliances**

Ensures adherence to policies.

#### **No Spreadsheets, No Maintenance Hassles**

Simplifies operations.

#### **Smart Routing**

AI Agents intelligently route calls to the appropriate Eltropy Queue or transfer externally based on context, ensuring seamless member experiences and efficient resolution.

#### **24/7 Support in Any Language**

Communicates in the member's preferred language.

## Comparing Old & New

	v1	v2 (genAI)
<b>Interaction Type</b>	Menu-based (Predetermined)	<b>Conversational AI (Flexible)</b>
<b>Knowledge</b>	Predetermined FAQs	<b>Knowledge Base Response</b>
<b>Voice Response</b>	Artificial / Robotic	<b>Humanized Voices</b>
<b>Personalization</b>	No Personalization	<b>Highly Personalized</b>
<b>Languages</b>	Limited Support	<b>Multilingual (Up to 10 languages)</b>
<b>Maintenance</b>	Managed Service	<b>Self-Service (10x Faster)</b>

## Safe AI Guardrails

### Product Positioning Layer

Usage & Best Practices Guide  
User Responsibility  
Messaging to Indicate Interaction with AI

### Application Design Layer

Provide Post Call Transcript  
Provide an Easy Way to Escalate to an agent  
Escalate on Failure  
Provide an easy way to report/provide feedback  
Limit response length  
Ask user confirmation before writes/changes

### Programmable Guardrail Layer

Semantic routing and Out-of-scope detection  
Output validation for Core Data  
Abstract/Obfuscate PII/Sensitive data

### Model Layer

Measures taken to reduce hallucination  
Harmful content filters, bias mitigation  
Finetuning and alignment process

## Key Features

### **GenAI Knowledge Based Responses**

Provides accurate and contextual answers.

### **Intent-Based Responses**

Understands and resolves member queries intuitively.

### **Core Automation Workflows (Read/Write)**

Automates transactions with direct integration to the core.

### **Intelligent Process Automation**

Calls tools and processes dynamically.

### **Humanized Voices**

Creates a natural and empathetic member interaction experience.

### **Multilingual Deployment**

Supports multiple languages for wider accessibility.

### **No-Flow Design**

Speeds up deployment by 10x with streamlined configuration.

### **SafeAI Architecture**

Ensures robust data security and compliance.

### **Live VoiceCP Link**

Enables multimodal and multi-channel communication.

### **Agent Performance Insights Dashboard**

Tracks performance and identifies areas of improvement.

### **Auto-Quality Scoring & Alerting Mechanism**

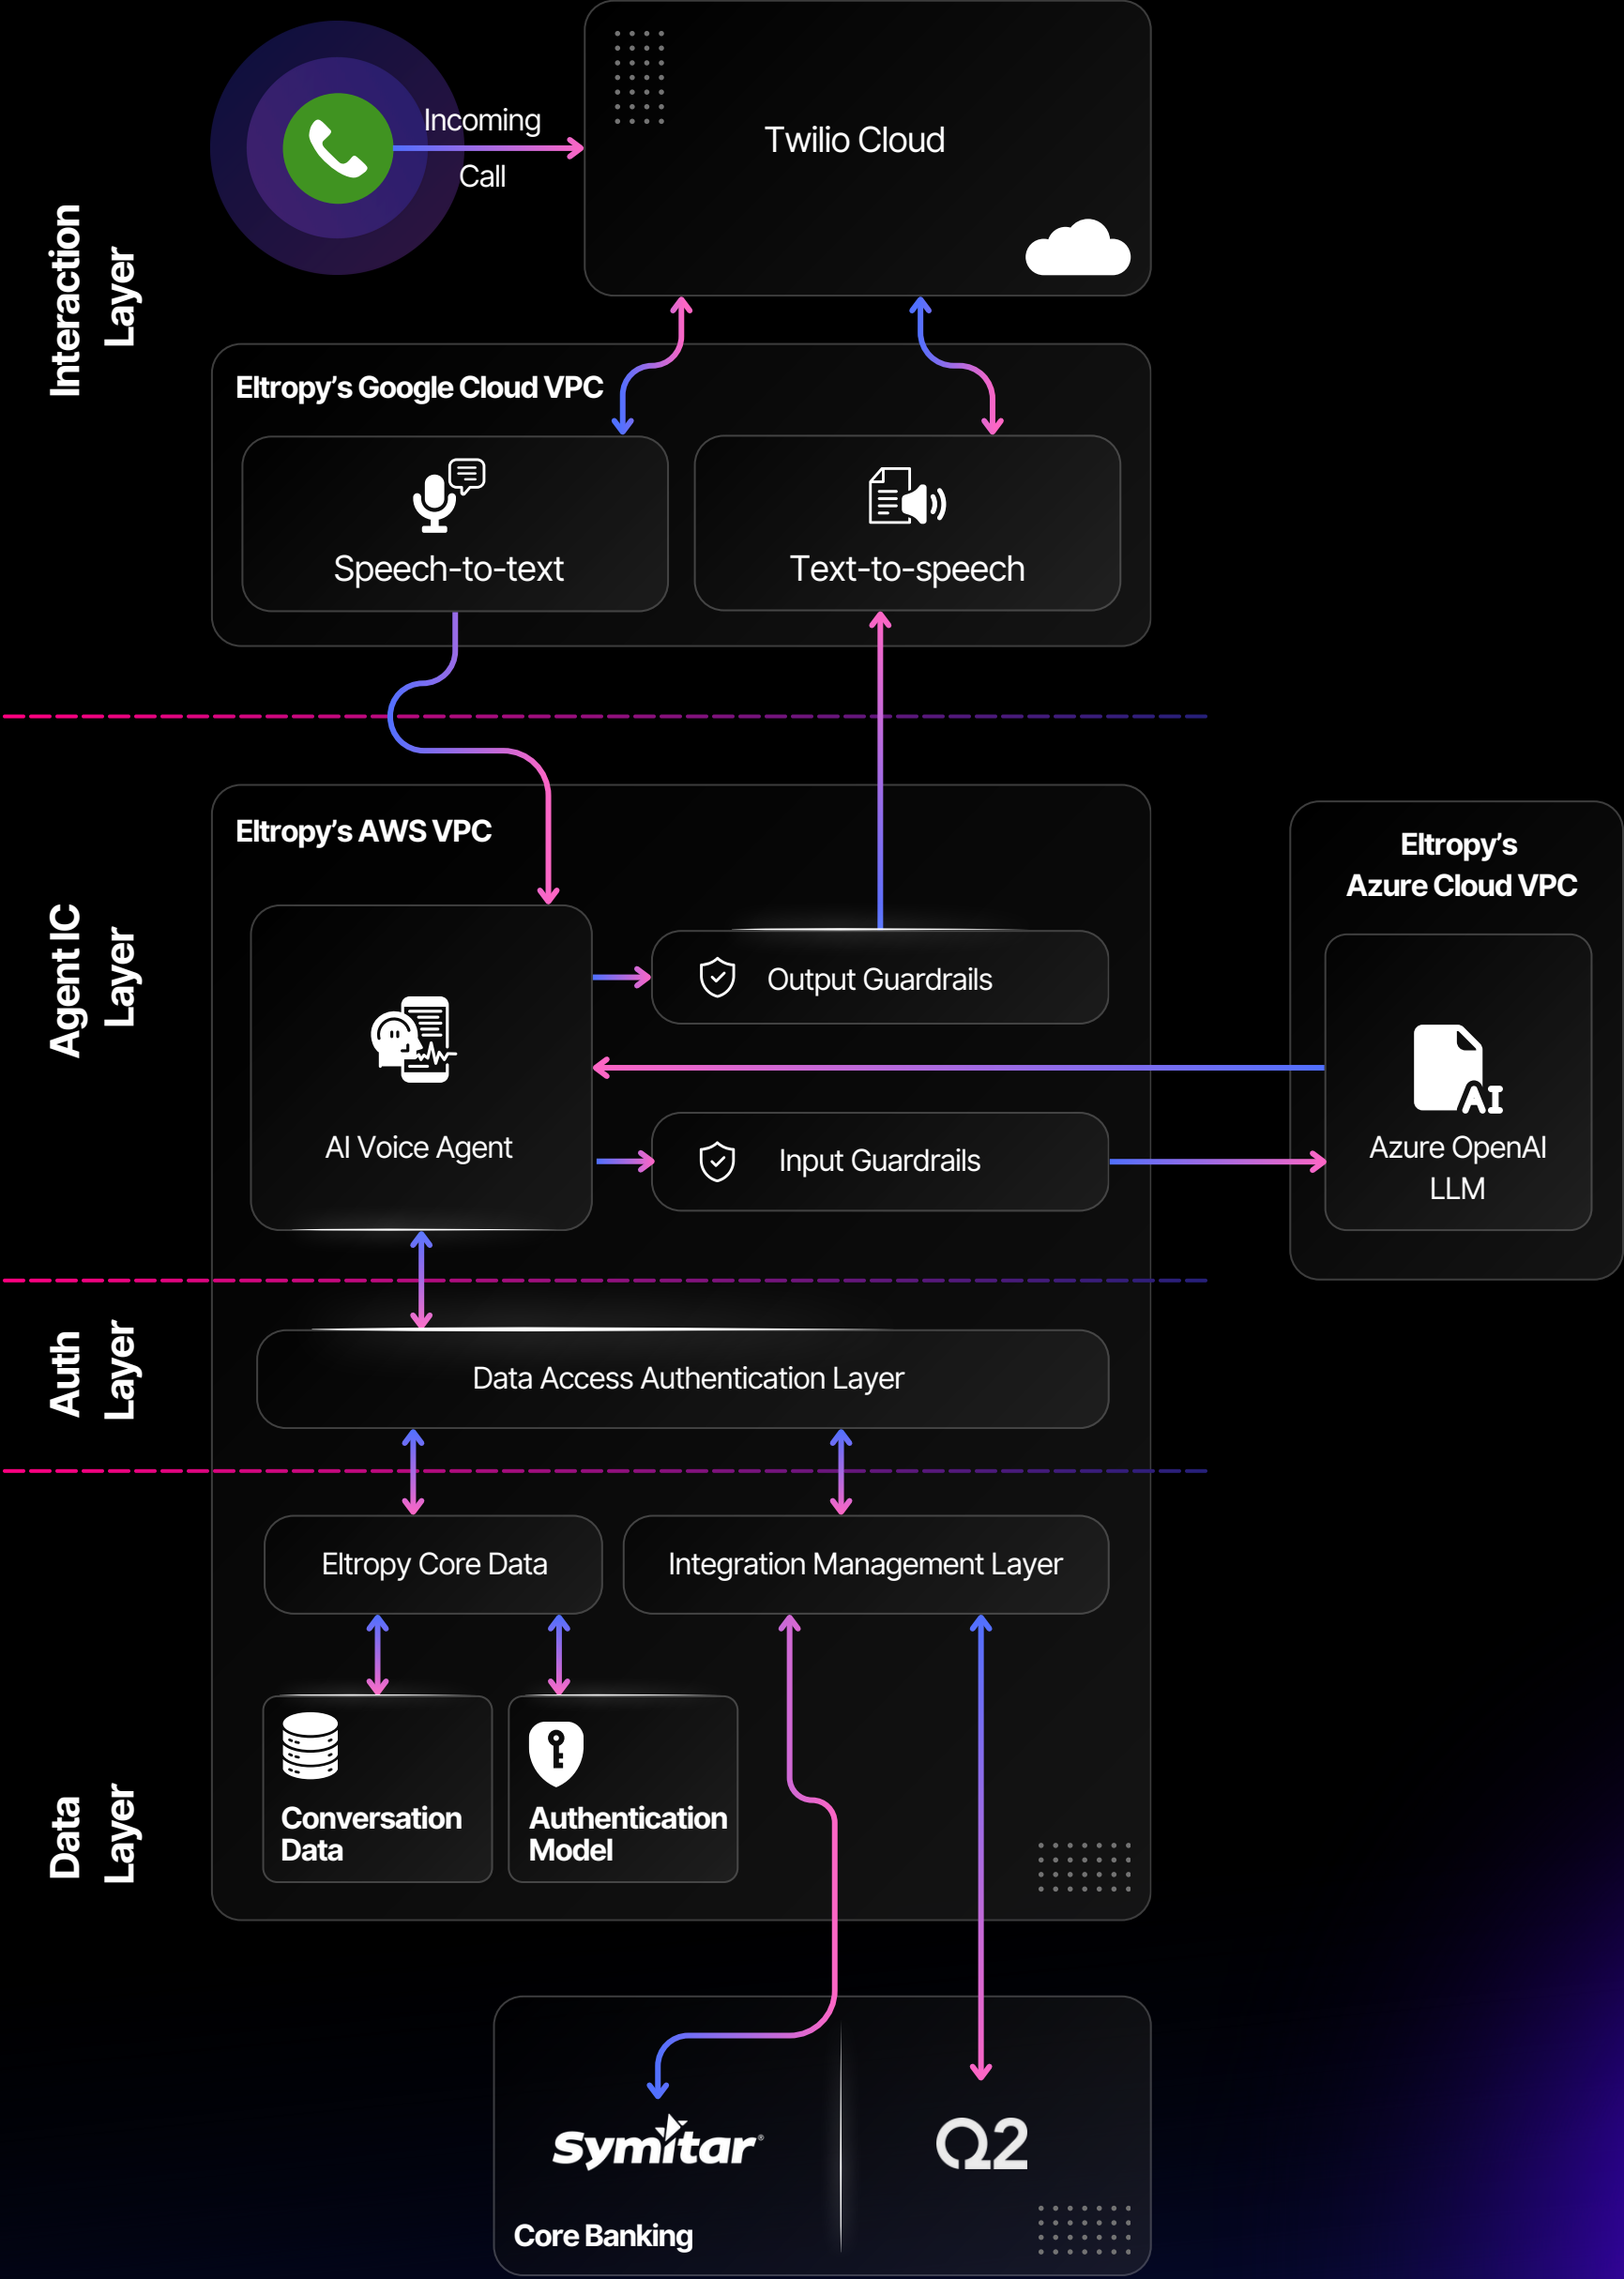

Ensures high-quality interactions.

### **Personalized Next-Best Product Recommendations**

Suggests tailored financial solutions.

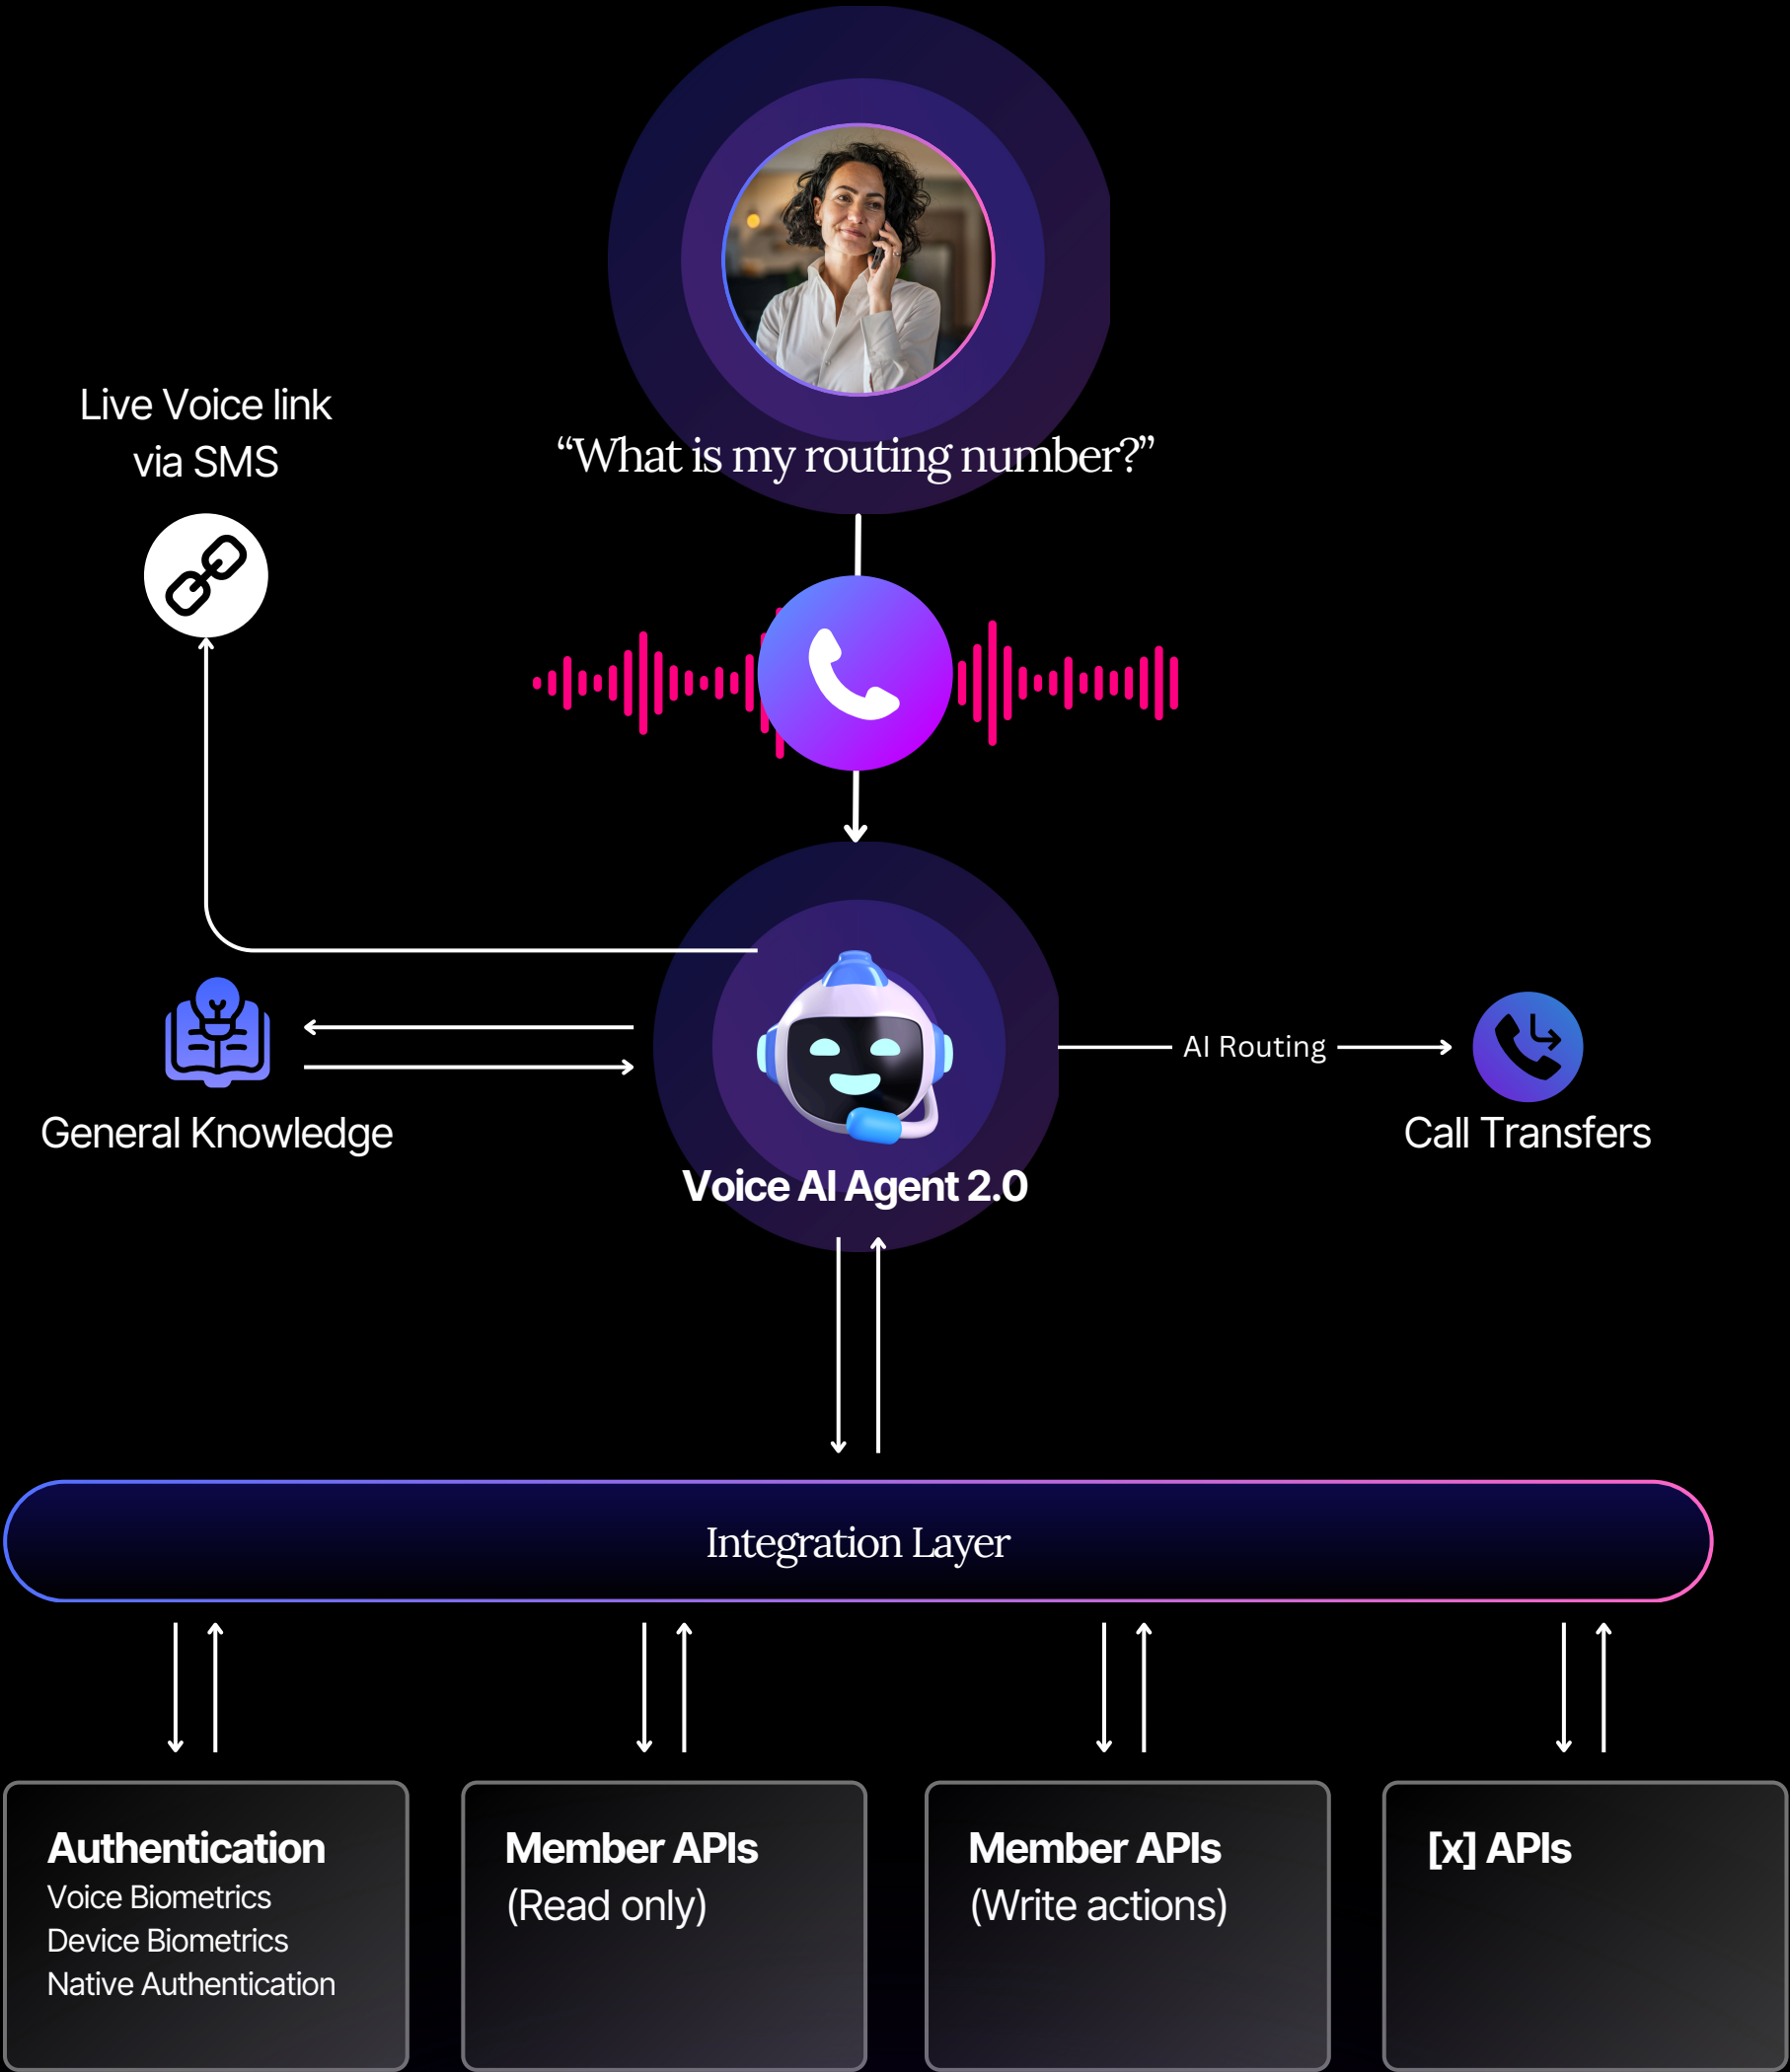

# AI Voice 2.0 Components-Architecture

# AI Voice 2.0 High-Level Workflow

## Product Capabilities

### AI Website Navigation

Enable seamless and intuitive website navigation powered by AI, allowing members to find information and complete tasks on your digital platforms easily.

### GenAI Knowledge Response

Leverage a robust Knowledge Base Response system to provide instant, accurate answers to member queries, enhancing self-service capabilities and reducing wait times.

### Robust Knowledge Management System

Deploy an AI Knowledge Management System that intelligently organizes and retrieves information, ensuring members access the most relevant and up-to-date content.

### Transfers to Agent on Any Channel

Facilitate seamless transfers to human agents across any channel, ensuring members can easily escalate their inquiries when needed.

### Comprehensive AI Agent Performance Insights

Gain in-depth analytics on your AI Agent's performance, empowering you to monitor, optimize, and fine-tune its operations for maximum efficiency and effectiveness.

### Advanced NLU for Request Understanding

Utilize advanced Natural Language Understanding (NLU) to accurately interpret member requests, ensuring precise and relevant responses for a superior member experience.

### Automatic Multi-Language Support

Offer multi-language support to cater to diverse member demographics, ensuring clear and effective communication in their preferred language.

### Safe AI

Safeguard user data, adheres to regulations, and emphasizes transparency, ultimately ensuring a secure and trustworthy AI experience for users.

### Integrate into Your OLB Platforms & Apps

Easily integrate AI Agents into your existing online banking platforms and mobile applications, enhancing functionality and providing a unified member experience.

# Voice Banking, Humanized.

Empowering financial institutions with cutting-edge AI to redefine the future of member experience.

AI Voice Agents represents a new era in AI-driven communication for community financial institutions. By leveraging Safe AI this solution empowers credit unions to enhance member satisfaction, optimize operational efficiency, and deliver personalized experiences at scale. With 24/7 multilingual support and intelligent automation, it's more than a tool—it's your trusted partner in revolutionizing member engagement.
